

PRODUCT DESCRIPTION

SPECTEC's gear actuated Zero Speed/Position Sensors are designed to switch in the presence of ferrous targets such as gear teeth and blade tips etc. Gear teeth as small as module 0.5 or 48 DP can be sensed.

The standard output is NPN Supply Tracking 0-Vs, provided from a 3k Ohm internal pull-up resistor to a collector, which can sink 25 mA. The output is normally high with no target present. Other output signal options are available; please see Page 2 for details.

CONNECTOR PINOUTS

Note: The magnetization level for special or low mag sensors is designated as a suffix to the P/N, ie: 0165-11111-500G Designating a gauss level of 500±50. (Standard mag. level will NOT have a suffix)

A Normally Low output signal is available for the NPN output signal option (TTL, Supply Tracking and Open Collector) by adding '-NL' to the end of the part number.

Similarly, a Normally High output signal is available for the PNP output signal option by adding '-NH' to the end of the part number.
